Maximize your environmental impact by creating a home field advantage in which your colleagues and students can win! Supporting Essications on the Bus

Patrick Mulick, Consultant

Specifically for special education drivers, this workshop explores the escalation cycle that some special needs students may encounter on the bus. While these can create some of the most dangerous moments in transportation, they are moments that can be minimized, reduced, and in some cases avoided through the use of appropriate proactive and reactive strategies. Get equipped with methods of intervening and be prepared for the next moment of crisis.
